

FOR HEALTHY VISION

CORONAVIRUS UPDATE

TO: SCHOOL PARTNERS
FROM: TIM GRESHAM, PRESIDENT & CEO, CONEXUS
RE: CONEXUS VISIOCHECK AND MOBILE VISION CLINIC SERVICE DELIVERY
DATE: MARCH 16, 2020

We consider it a blessing to provide your students with high quality vision screenings, along with our Mobile Vision Clinic (eye exams and glasses) to those identified with a possible vision deficiency. We look forward to working with you and your staff to resume these services as schools reopen.

We have completed our VisioCheck (digital vision screenings) in all your schools. We still have a few days of Mobile Vision Clinic eye exams that will need to be rescheduled. In addition, we are receiving your students' eyeglasses from the lab every day. As they come into our office, we will continue to check the prescriptions and ready those glasses for dispensing to your students.

At this point, we are hoping and praying we will have time to dispense these glasses to your students with our licensed opticians, once school resumes. If schools are closed longer than we anticipate, we will reach out to you about alternative ways to deliver eyeglasses to your students.

We are so grateful for you and your teams as we partner to eliminate poor vision as a barrier to success. Wishing you good health as you maneuver through some unknown territory. Conexus stands ready to assist in any way we can, and we look forward to the day when we can look back in hindsight knowing we persevered and did our best to balance health concerns with returning to normalcy!
